## Strategies and Countermeasures for the Impaired Driving Emphasis Area.

| Strategy<br>#1                | Use data systems to identify alcohol licensed and permitted locations within a community and Alcoholic Beverage Code violation history at these locations to determine any correlation with alcohol related crashes |  |
|-------------------------------|---|--|
| Countermeasures and Programs: |   |  |
| <b>1</b> a                    | Develop and maintain data to identify correlations between impaired driving crashes and citations, road type, corridor, region, county and community and Texas Alcohol Beverage Control licensing data.             |  |
| 1b                            | Track frequent driving under the influence (DUI) offenders to identify and address persons with multiple impaired driving arrests and/or crashes. Pursue more intensive interventions.                              |  |
| 1c                            | Partner, where possible, with community groups and task forces to promote a comprehensive action plan to determine and address community hot spots.   |  |

| Strategy<br>#2 | Increase education for all road users on the impact of impaired driving and its prevention  |  |  |  |
|----------------|---|--|--|--|
| Counterme      | Countermeasures and Programs:   |  |  |  |
| <b>2</b> a     | Identify gaps in knowledge with respect to the impact of illegal behaviors (e.g., specifically prescription drugs, marijuana and substances other than alcohol) on road safety. |  |  |  |
| 2b             | Identify gaps in knowledge on the negative consequences of traffic violations among road users (e.g., fines, loss of license, effects of criminal record on future employment). |  |  |  |
| 2c             | Demonstrate to all road users the magnitude of the impact of impaired driving crashes on fatality rates by making comparisons with other causes of death (e.g., murder rate).   |  |  |  |
| 2d             | Demonstrate to all road users the magnitude of the cost and liability exposure associated with impaired driving crashes resulting in injury and/or fatality.                    |  |  |  |
| 2e             | Educate medical professionals to inform patients of the effects of medications on the ability to drive or operate heavy machinery.  |  |  |  |
| 2f             | Identify the gaps in knowledge of judges and prosecutors about impaired driving and provide messaging or training to close the gaps.  |  |  |  |
| 2g             | Educate emergency medical professionals about the changes in the Blood Test law, which has been modified from the option to refuse format.                                      |  |  |  |

| Strategy<br>#3 | Increase officer contacts with impaired drivers through regular traffic enforcement   |  |  |
|----------------|---|--|--|
| Counterme      | Countermeasures and Programs:   |  |  |
| 3a             | Educate the police, community leaders, public, and traffic safety partners on the role of regular traffic enforcement as a primary tool in detecting impaired drivers.  |  |  |
| 3b             | Use a data driven approach to optimize areas and times for enforcement.   |  |  |
| 3c             | Identify trends in DUI arrests and compare the data to trends in citations and crashes.   |  |  |
| 3d             | Identify training gaps for police on locations with a high probability for alcohol and drug use that lead to impaired driving (e.g., breaking up/preventing underage drinking parties).   |  |  |
| 3e             | Encourage motorists to safely report potential impaired drivers to law enforcement.   |  |  |
| 3f             | Research and identify strategies to streamline the system of processing impaired drivers.   |  |  |
| 3g             | Conduct surveys to assess public support for sobriety checkpoints and enhanced impaired driving penalties; develop a report on the survey results and impaired driving countermeasure effectiveness; and share the reports with lawmakers and the public. |  |  |

| Strategy<br>#4                | Improve mobility options for impaired road users   |  |
|-------------------------------|--|--|
| Countermeasures and Programs: |  |  |
| 4a                            | Educate the public and community leaders on methods for identifying mobility options at the community level.                       |  |
| 4b                            | Create local task forces to identify local actions.  |  |
| 4c                            | Promote trip planning, including designated drivers, public transportation, taxis, and alternate transportation service companies. |  |

| Strategy<br>#5                | Increase data, training, and resources for prosecutors and officers in the area of drugged driving   |  |
|-------------------------------|--|--|
| Countermeasures and Programs: |  |  |
| 5a                            | Develop training for prosecutors and regular patrol officers on detecting and prosecuting drugged drivers.   |  |
| 5b                            | Develop joint training for prosecutors and laboratory personnel (Forensic Toxicologist) to assist in presenting scientific evidence of drug impairment in court. |  |

| 5c | Continue and increase Standardized Field Sobriety Testing (SFST), Advanced         |
|----|--|
|    | Roadside Impaired Driving Enforcement, and Drug Recognition Evaluator (DRE)        |
|    | training.  |
| 5d | Identify methodologies and resources for improving the identification of           |
|    | drugged driving as a contributing factor in impaired driving crashes.              |
| 5e | Secure additional resources for laboratories.                                      |
| 5f | Continue to monitor the development of roadside drug testing instruments and,      |
|    | as appropriate, investigate deploying them into the field as an additional tool to |
|    | detect impaired driving.   |
| 5g | Encourage adoption of laws that increase penalties for impaired driving.           |
| 5h | Encourage adoption of laws that streamline the processing of impaired drivers      |
|    | by law enforcement.  |
| 5i | Encourage adoption of laws that allow sobriety checkpoints.                        |
